FUEL PROCESSING TECHNOLOGY

Contents of Volume 52 (1997)

Vol. 52, No. 1–3

Special Issue: Fifth International Symposium on the Biological Processing of Fossil Fuels

Guest Editors: Ángel Cámara, Fernando Laborda and Immaculada F. Monistrol

Preface v

Biological processing of fossil fuels 1
Environmental aspects of bioconversion processes
J. Klein, F. Pfeifer, S. Schacht and Ch. Sinder (Essen, Germany) 17
Extracellular oxidative enzymes of coal-attacking fungi
G. Willmann and R.M. Fakoussa (Bonn, Germany). 27
Fungal attack on coal: I. Modification of hard coal by fungi
M. Hofrichter, F. Bublitz and W. Fritsche (Jena, Germany) 43
Fungal attack on coal. II. Solubilization of low-rank coal by filamentous fungi
M. Hofrichter, F. Bublitz and W. Fritsche (Jena, Germany) 55
A system to analyze the complex physiological states of coal solubilizing fungi
U. Hölker, H. Mönkemann and M. Höfer (Bonn, Germany) 65
Components of the ligninolytic system of *Fusarium oxysporum* and *Trichoderma atroviride*
H. Mönkemann, U. Hölker and M. Höfer (Bonn, Germany) 73
Transformations of low rank coal by *Phanerochaete chrysosporium* and other wood-rot fungi
J.P. Ralph and D.E.A. Catcheside (Bedford Park, SA, Australia) 79
Study of the mechanisms by which microorganisms solubilize and/or liquefy Spanish coals
F. Laborda, M. Fernández, N. Luna and I.F. Monistrol (Madrid, Spain) 95
Macromolecular structure of brown coal in relationship to the degradability by microorganisms
H. Schmiers and R. Köpsel (Freiberg, Germany) 109
Mechanisms of biologically-mediated methane evolution from black coal
A. Panow, J.M.P. FitzGerald (Hawthorn, Vic., Australia) and D.E. Mainwaring (Melbourne, Vic., Australia) 115
Development of an electro-spray bioreactor for crude oil processing [1]
E.N. Kaufman, J.B. Harkins, M. Rodriguez Jr., C. Tsouris, P.T. Selvaraj (Oak Ridge, TN, USA) and S.E. Murphy (The Woodlands, TX, USA) 127
Whole cell biocatalysis for an oil desulfurization process
L. Setti (Bologna, Italy), G. Lanzarini (Potenza, Italy) and P.G. Pifferi (Bologna, Italy) 145
Microbiological desulfurization of column-packed coal
A. Morán, A. Aller, J. Cara, O. Martínez, J.P. Encinas and E. Gómez (León, Spain) 155
Influence of biological desulphurisation on coal combustion performance
F. Rubiera (Oviedo, Spain), A. Morán, O. Martínez (León, Spain), E. Fuente and J. Pis (Oviedo, Spain) 165

Elsevier Science B.V.

Waste pyritic coal as a raw material for energetic industry
J. Gąsiorek (Poznań 62-030, Poland) 175
Microbial ecology studies for the desulfurization of Spanish coals
F. Gómez, R. Amils and I. Marín (Madrid, Spain) 183
Desulfurization of model aromatic molecules by *Pedomicrobium* sp.
C. Ercole, M.P. Sulpizii, F. VegliÒ (L'Aquila, Italy), S. Bartolini (Fidenza, Italy), L. Toro and A. Lepidi (L'Aquila, Italy) 191
Benzothiophene and dibenzothiophene as the sole sulfur source in *Acinetobacter*: growth kinetics and oxidation products
M. Marzona, E. Pessione, S. Di Martino and C. Giunta (Torino, Italy) 199
The use of chemical markers in the evaluation of crude oil bioconversion products, technology, and economic analysis
E.T. Premuzic, M.S. Lin, H. Lian, W.M. Zhou and J. Yablon (Upton, NY, USA). 207
Effects on the molecular weight distribution of coal-derived humic acids studied by ultrafiltration
K. Henning, H.-J. Steffes and R.M. Fakoussa (Bonn, Germany) 225
The effect of radiation to enhance the bioconversion of coal
L.G. Gazsó (Budapest, Hungary) 239
The slurry-column coal beneficiation process
G.F. Andrews and K.S. Noah (Idaho Falls, USA). 247
Rheinbraun's concept for power generation based on biotechnologically converted lignite
M. Reich-Walber, H. Meyrahn and U. Lenz (Cologne, Germany) 267
